

Sustainable machine readiness throughout the entire lifecycle, from day one to day done

A quick overview

Maximize your machines' potential throughout its lifecycle

The pharmaceutical production landscape of today is a demanding one. Maximizing uptime and operational efficiency is critical. With our Machine Services we provide a proactive partnership, empowering you to achieve peak performance and sustainability throughout every stage of your machine's lifecycle. From proactive planning and seamless installation to continuous optimization and sustainable upcycling, we offer the right support for every phase.

Explore our Machine Services and get Ready already.

Preparation

A strong start is essential for your long-term success. Proactive planning minimizes costly delays and ensures a smooth, efficient start. Together with you, we analyze your production environment, anticipate future needs, and create a customized service plan.

Installation

A flawless installation is the foundation for a productive lifecycle and ensures your machine integrates seamlessly and sustainably into your operations. To achieve this, we manage every detail for you, from transport and setup to validation and training.

Production

Maintaining your peak performance requires proactive support. Ideally implemented, it minimizes downtime to maximize output throughout your machine's operational life. That's why we support you with data-driven insights, intelligent troubleshooting and continuous measures, so you stay ready already.

Optimization

The production landscape is constantly changing. Optimization ensures your machines adapt and evolve to meet new demands. We support you in identifying areas of opportunity to enhance your machinery, empower your operators, and optimize your production environment with purpose.

Upcycling

Responsible end-of-life management maximizes the value of your investment and minimizes environmental impact. As sustainability is a top priority at Körber, we support you in leveraging the numerous opportunities that exist to strategically plan and transform the end-of-life phase of your machines – for your business and the planet.

Preparation

Key services

- Service level contracts
- Spare parts packages
- Basic operator training
- Packaging & inspection evaluation

Your benefits

- Proactive consulting
- Optimized performance from day one
- A confident and well-trained team

Installation

- Installation & ramp-up services
- Validation & qualification services & certification
- Production support
- Targeted operator
- Technician training

- Proactive consulting
- Optimized performance from day one
- A confident and well-trained team

Production

- Maintenance tailored to your production requirements
- 24/7 technical support
- Spare parts management
- Advanced training programs

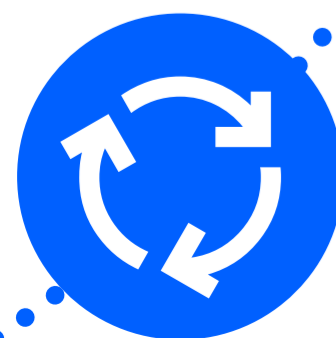

- Maximized output
- Minimized unplanned downtime
- Achievement of production goals
- Continuous improvement
- Further development of know-how in the team

Optimization

- Format parts
- Modernization & retrofits
- Consulting (OEE, TCO, Sustainability)
- Digitalization solutions
- AI integration

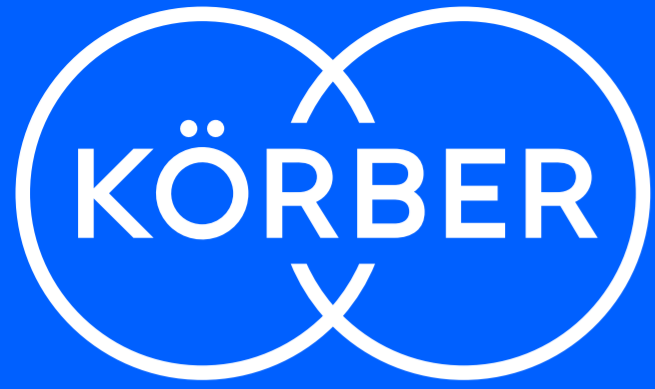

- Enhanced performance
- Extended machine lifespan
- Increased efficiency and flexibility
- Reduced operational costs
- Sustainable practices

Upcycling

- Buy-back programs
- Used machines marketplace
- Relocation services
- Decommissioning
- Recycling support

- Maximized return on investment
- Minimized waste
- Sustainable practices
- Seamless transitions
- Contribution to a circular economy

Expert support
for every machine
lifecycle phase.

Ready already.

Unlock the full potential of your machines and team with Körber Machine Services.

Our comprehensive lifecycle approach ensures peak performance, minimized downtime, and sustainable practices from day one to day done. We provide the expertise and support you need, every step of the way.

Any further questions?

We are happy to advise you about our solutions and services.
